EDUCATION

University of Texas at Austin **May 2026**

B.S. Computational Engineering

WORK EXPERIENCE

Apple **February 2022 - Present**

Intern, Messages Triage Engineer *Jan 2025 - Jun 2025*

- Investigated and diagnosed 1,800 bug reports with log analysis; 20 triaged reports resulted in software change
- Quickly identified and escalated recurring issues to development teams within 24 hours to ensure same week resolution
- Developed Python scripts to automate 3 product areas within the Messages app; reduced triaging time by 75%

Apple Support College Advisor *Feb 2022 - Present*

- Address customer issues for Mac, iPhone, iPad, and Watch systems to provide a resolution within 15 minutes
- Utilize problem solving skills to determine root cause of issues; reduced escalations by 90% percent
- Achieved 98% issue and resolution handling by accurately troubleshooting and solving technical issues

Texas Department of Transportation **May - August 2021**

Intern, Engineering Technician *Dallas, TX*

- Conducted on-site inspections of roadway components to ensure compliance of 100%
- Performed tests on materials used in construction and analyzed results to verify specifications were met

PROJECTS

Building Damage Assessment Using Neural Networks | Python, Flask, Docker

- Collaborated on developing neural networks utilizing different model architectures to assess and accurately catagorize building damage

Breast Cancer Diagnosis API | Python, Flask, Docker, Kubernetes, Redis

- Collaborated on developing a Flask application in conjunction with Redis and Kubernetes to query, store, and deploy an application for breast cancer diagnosis

International Space Station Tracker | Python, Flask, Docker

- Flask application to query information and positional data regarding the ISS

SKILLS

Languages: Python, Swift, R, C++, HTML, CSS, JavaScript

Technologies: Flask, Redis, Docker, Kubernetes, git, Linux
